Kevin J Martin
Chair, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear Kevin Martin:

The Internet has become an integral part of American life and will only become more important in the future. That is why all Americans, especially American school children, need access to Internet service that's free, fast, and family-friendly - at school and in the home.

Unfortunately, current prices for broadband in the United States are among the highest in the world. No American child should be left behind because existing broadband options are not affordable.

Furthermore, parents and teachers are currently saddled with the burden of trying to protect children from indecent material on the Internet. Network level filtration of indecent content is the best solution available to ensure that children cannot access explicit Web sites, allowing parents and teachers more freedom to utilize the educational resources available online.

Implementation of a proposal now pending with the FCC, such as the one submitted by M2Z Networks (www.m2znetworks.com) to provide a universal, free, fast, and family-friendly broadband service, is supported by the Coalition for Free Broadband Now and is a necessary step to both ensuring that American school children, parents and teachers have affordable broadband access and to protecting our children online. I urge you to act on such proposals today!

Sincerely,

Mark Burnett
